

V1.0.0

Using a 32-bit motor driver chip and
Field-Oriented Control (FOC), the
RoboMaster CS20 Brushless DC Motor Speed
Controller enables precise control over motor
torque.

Exclusively designed for the RoboMaster
series, the CS20 Brushless DC Motor and
CS20 Brushless DC Motor Speed Controller,
the CS20 Series consists of two modules: a motor
module and a terminal board.

RoboMaster System Specification Manual,
RoboMaster System User Manual, Introduction
of RoboMaster System Module

The CS20 Series consists of two modules: a motor
module and a terminal board, ensuring a
complete and reliable system solution for your
competition robot.

The 25th China University Robot Competition

ROBOMASTER 2026

University Championship

Participant Manual

Prepared by RoboMaster Organizing Committee

Released in October, 2025

Statement

Participants are forbidden from engaging or participating in any actions determined by the RoboMaster Organizing Committee (hereinafter referred to as “the RMOC”) as involving public disputes or sensitive issues or causing offence to the public or certain social groups, or damaging the image of RoboMaster; otherwise, RMOC shall have the right to disqualify offending persons permanently from the competition.

1. Foreword

1.1 About the Competition

Affiliated with the China University Robot Competition, the RoboMaster University Series (RMU) provides a platform for robotic competitions and academic exchanges among global technology enthusiasts. Since its establishment in 2013, the RoboMaster has been committed to its mission – “empowering young learners to transform their world with the power of engineering and technology”. The RoboMaster is also dedicated to tapping the potential of young talents with engineering backgrounds while widely passing on the beauty of science & technology as well as innovation to the public.

The RoboMaster University Championship (RMUC) focuses on evaluating the participants’ abilities to apply scientific and technical knowledge in an integrated and practical context. It deeply incorporates a wide array of robotics technologies, including “machine vision,” “embedded system design,” “mechanical engineering,” “autonomous navigation,” “human-robot interaction,” and “RF front-end.” Furthermore, it ingeniously blends engaging presentation styles with thrilling robot combat, resulting in more intuitive and fierce confrontations that capture the keen interest of technology enthusiasts and the wider public.

1.2 Main Changes to New Season

- Adjusted the registration requirements
- Adjusted the definition of participating teams and merge team categories.
- Revised the definition and responsibilities of the Team Advisor
- Cancelled the division for Hong Kong, Macau, Taiwan, and overseas teams
- Adjusted the technical assessment system and removed non-required sections for Tier-1 Teams.
- Adjusted certain awards and prize distribution

2. Participation

2.1 Registration Requirements

You are eligible for registration if you meet any of the following criteria:

- Teams that have successfully passed the Mid-Term Progress Assessment in RMUC 2024 or RMUC 2025
- Teams that successfully advance from the Group Stage of the 3V3 Match in RMUL 2025 (if there are two rounds in the Group Stage, advancement in the first round will be the benchmark); the requirements for Tier-2 Teams may be relaxed to allow those that have won second prize in the main awards.

- To form a joint team, at least one of the participating teams must meet the RMUC eligibility requirements for registration.
- The RMUC registration requirements will be adjusted each season based on actual circumstances and will be finalized when registration opens for that season.

2.2 Participating Teams

- Due to legal and regulatory restrictions in overseas regions and countries, overseas teams are currently unable to create a team or complete registration on the official RoboMaster platform. Overseas team creation, registration, subsequent technical assessment sections, and roster collection will all be conducted via Wenjuanxing. Overseas team registration portal:

<https://djistore.wjx.cn/vm/QUtHClK.aspx>

- The distinction in naming teams from Mainland China, Hong Kong, Macao, Taiwan, and overseas Teams is provided solely to clarify instances where different participation procedures apply due to the geographic location of the university.

Teams must adhere to the following rules:

- R1 All participating teams must be created on the RoboMaster forum by the team's Head Supervisor or Captain. If a team already exists, there is no need to create it again. When creating a team, you need to provide all required team information as specified by the platform. To obtain the invitation code, please contact the RoboMaster Event Staff. After preparing the team, the team leader can invite team members to join via an invitation link. In the team space, click Registration for the competition to enter the competition registration module. Select the event you wish to register for, click Register Now, and follow the instructions to complete the Registration submission process. If all the requirements in this section are met, the registration will be successful. The RMOC will periodically open the Entry List adjustment function during the season, allowing participating teams to change their team members during the open period. All information is based on the final

Entry List confirmed during the current open period. No changes can be made after the period has ended. The Registration Center will be open for one last time before the competition starts. The RMOC will follow the final information submitted in preparing and giving out award certificates.

- R2 Any team participating in different competitions must use the same team name. A team's name must be in the format of "XXX Team", where "XXX" is the team's self-chosen name. The total length of the team name should not exceed 16 English letters or 8 Chinese characters. The team name must not include the university or college name or its abbreviation in Chinese/English, or such Chinese characters as “队”, “团队”, and “战队” which mean “team” in English, or other special symbols such as “*/-+”. The team name must reflect the positive and pioneering spirit of the team and comply with relevant state laws and regulations. If the RMOC determines that a team's name does not align with the spirit of the competition, it has the right to require the team to change its name.
-

After submitting their registration materials, participating teams are not allowed to change their team names.

- R3 A participating team must be affiliated with a higher education institution, and must meet the requirements for personnel roles, team size, and qualifications as specified in “2 Participation ”.
- R4 In principle, each college or university is only allowed to have one qualified team for one competition (challenge). Some institutions have multiple campuses in different cities, making it difficult for inter-campus students to compete as a team. Such institutions are allowed to form more than one campus-based teams once the situation has been verified by the RMOC. If a school has more than one participating team submitting a registration, please refer to the [“List of Representative Teams for RoboMaster 2026 University Series”](#) for the detailed Registration review guidelines. The applicant must ensure that their registration information is complete and accurate, and that they will undertake the corresponding responsibilities. The applicant must bear all consequences caused by any missing or inaccurate information. For special circumstances, the applicant may contact the RMOC, which will handle the case based on actual circumstances. The RMOC reserves the right of final interpretation.
-

The RMOC will reject the registration of any team that does not meet any of R1-R4. The participating team can reapply until it meets the requirements.

- R5 Any two schools that do not have their own individual teams can form an intercollegiate team.
- A. Before establishing an intercollegiate team, members must consider all their respective circumstances and communicate with each other thoroughly about team planning. Any operating and R&D costs, personnel arrangements or disputes arising therefrom must be handled by the intercollegiate team itself, for which the RMOC bears no responsibility.

- B. Intercollegiate teams are not allowed to be split after they're officially established. They can only participate in the RMUC 2026 as intercollegiate teams. If an intercollegiate team that has passed registration review is split up, it will be considered as voluntarily forfeiting participation eligibility.
- C. The intercollegiate team's name should be "XXX Intercollegiate Team" instead of "XXX Team." An intercollegiate team is required to upload an Intercollegiate Team Statement issued by its college or university to the registration system. The Intercollegiate Team Statement template can be found in the Registration system section instruction.

R6 In this season, each participant can only join one team for the competition.

R7 If any two or more teams do not meet any requirement under the "Five Differences" Rule, they will be treated as the same team.

"Five Differences" Rule: different team names, different team members, different supervisors, different affiliated institutions (college or other educational institutions), and different robots.

R8 Provided the relevant registration requirements are met, one team can sign up for more than one RoboMaster competition (including RMUC and RMUL).

R9 The RMOC will deem a team participating in different competitions in the same season as one and the same group to handle the various competition processes more efficiently (including free material supply, material purchases, and support for participants). A team cannot be broken up after completing registration for the season.

2.3 Participants

The RoboMaster Competitions advocate teamwork and cooperation. To encourage participants to actively take on key roles within the Team, the RoboMaster Organizing Committee will select awards such as Outstanding Captain and Outstanding Supervisor to recognize Participants who have made significant contributions to the RoboMaster competition. For more details, please refer to "5.7 Outstanding Contribution Award".

The roles and responsibilities of participants are as follows:

- Participants are not permitted to hold multiple positions concurrently.
 - All participants must meet the corresponding eligibility requirements and, if necessary, present relevant proof at the competition venue.
 - Regarding eligibility for awards: Team Advisors and reserve members are not eligible for awards and may only receive the electronic certificate of participation issued by the RMOC for the current season. Senior Advisors are not eligible for awards and may only enjoy event participation
-

benefits.

Table 2-1 Roles and Responsibilities of Participants

Position	Position Description	Responsibilities	Identity	Number of Personnel
Supervisor	The team's supervisor	● Responsible for team formation, management, and major decision-making	Faculty personnel who will graduate before March 2026 and have research or teaching qualifications at the university from September 2025 to August 2026.	0-7
Head Supervisor	● The head of supervisors ● The main liaison with the RMOC	● Responsible for building team culture and fostering positive values among team members ● Responsible for the team's legacy building and development ● Guide the team in building their robots ● Coordinate on-campus resources, guide the team in developing project plans, and help the team successfully conclude the match ● Responsible for safeguarding the personal safety of the team and its property ● Cooperate with the RMOC proactively during the competition		1

Position	Position Description	Responsibilities	Identity	Number of Personnel
Team Advisor	Provide guidance and support on Participation experience for the team	● Provide guidance and support to the team in terms of technological innovation, tactical design, team management, and team building, etc. ● Support the legacy and continuity of the team ● Capable of handling practical robots construction tasks and miscellaneous participation-related matters.	● Has participation experience as a Regular Member of any Team in previous RMU seasons. ● Full-time college students, including associate, bachelor's, master's, and doctoral students, with proof of enrollment at this institution between September 2025 and August 2026.	0-5

Position	Position Description	Responsibilities	Identity	Number of Personnel
Senior Advisor	A professional who provides effective support and assistance to the team in a specific area.	Provide the team with strategic, technical, management, and funding support	Team members who graduated in previous seasons, as well as engineers, researchers, and teaching staff currently employed in enterprises, research institutions, or working as independent professionals.	0-5
Regular Member	Include the Captain, Vice Captain, Project Manager, Operation Manager, and general members.	Please refer to the table below.	Full-time students at higher education institutions, including associate degree,	10-35
Reserve Member	The Reserve Members of the team will be temporarily engaged in personal study and growth and may become Regular Members after being observed and promoted by the team.	Assist Regular Members in the competition	undergraduate, master's, and doctoral students, who can provide proof of enrollment from their university between September 2025 and August 2026.	0-20

Table 2-2 Regular Member Positions and Responsibilities

Position	Position Description	Responsibilities	Number of personnel
Captain	● Core team member ● The technical and tactical leader of the team ● Person in charge of building team culture ● The main liaison with the RMOC	● Responsible for forming the team, selecting and appointing personnel wisely, and developing effective strategies and lineups. Overall responsibility for personnel selection and training, allocation of team spots and award quotas, day-to-day management of personnel, and replacement of team members. ● Responsible for overseeing the formulation and evaluation of technical proposals and tactical plans, assessing risks, and making key decisions. ● Responsible for building team culture and fostering positive values among team members ● Responsible for maintaining and preserving documentation related to technology and management, establishing and iterating on team processes and mechanisms, and supporting the team's continuity and development. ● During the competition, participation in the Captains Meeting is required, as well as involvement in key event processes such as Result Confirmation and Appeals for each Match.	1
Vice Captain	Core team member	● Form the core management team along with the Captain ● Assist the Captain with the management of the team	0-3
Project Manager	● Core team member ● Oversee project progress and risk management	● Responsible for developing plans for each stage of the match, including setting objectives, timelines, and budgeting.	1

Position	Position Description	Responsibilities	Number of personnel
		● Collect feedback on relevant requirements and suggestions, ensure effective process control for all tasks, identify and provide early warning of project risks, and ensure successful project delivery and closure. ● Responsible for internal communication and coordination within the team, supporting team building and the development of organizational systems, and addressing resource and scheduling issues encountered during projects. ● Study project management processes, methods, tools, and rules, and promote and implement them within the team Note: ● Project managers are advised to acquire basic knowledge required by Project Management Professional (PMP) education and familiarize themselves with general concepts and theories of project management. ● As a key management member of the participating team, the project manager is advised to collaborate closely with each robot R&D sub-project team, engage in and observe the entire process from robot design to production, and acquire the necessary fundamental knowledge	
Operations Manager	● Core team member ● Responsible for team publicity, investment attraction, logistics, finance, and other operations	● According to the annual assessment requirements set by the RMOC, the operation manager consolidates the team's publicity efforts to convey consistent messages, enhances cultural building, and creates a comprehensive publicity system. Relevant responsibilities include, but are not limited to:	1–4

Position	Position Description	Responsibilities	Number of personnel
	The one who inherits, builds, and promotes team culture	➤ Plan and implement cultural building initiatives to sustain a positive team culture ➤ Keep track of the team's R&D progress, explore the cultural elements in the robot development process, write and disseminate compelling team narratives, and build team identity around core figures ➤ Integrate the event's culture with team culture and promote it through documentation, promotion, and other initiatives ➤ Utilize images, videos, activities, and create other types of content to showcase the team's exceptional skills and expertise, document the competition process, and provide ample promotional materials for the team ● Responsible for the organization and systematic implementation of other team operations, including but not limited to: ➤ Plan and organize team recruitment, team-building activities, and technical exchanges ➤ Oversee the team's financial affairs and process management, and engage in R&D cost control	

Position	Position Description	Responsibilities	Number of personnel
		➤ Communicate with the departments of their university or college, alumni companies, and industrial parks, create and pitch the team's business proposal, identify partners through various channels, and secure technical support and sponsorship for the team in accordance with the requirements set by the RMOC ➤ Provide logistical support to the team and assist the Captain in planning and executing travel arrangements	
General Member	Ordinary members of the team, including the Standby Captain, Technical Lead, Robot Team Lead, Quality Management, and others.	-	0–32

Participating Teams may also assign the following concurrent roles as needed, including but not limited to: Standby Captain, Technical Lead, Robot Team Lead, and Quality Management.

Table 2-3 Concurrently Held Positions

Position	Position Instruction	Responsibilities	Quantity
Standby Captain	The individual selected as the next Captain, already confirmed and announced within the team.	● Gradually get familiar with the team's management processes to prepare for taking the role of Captain next season. ● Engage in the core competition processes and team management at the event.	Each team must specify a Standby Captain when submitting the roster for the Regional Competition.

Position	Position Instruction	Responsibilities	Quantity
Technical Lead	Leader of a single technical area, such as mechanics, embedded/electrical system, algorithm, and hardware	● Manage personnel and other resources in the specific technical area, as well as design training schemes for new team members ● Support Robot Team Leads in assigning personnel specializing in the technical area to different robot teams, through the lens of technical expertise	0 or 1 lead per technical area
Robot Team Lead	Leader for a single robot type, such as Hero, Engineer, Infantry, Drone, Sentry, Radar, and Dart System	● Design the underlying architecture for the corresponding robot type and make decisions on key technical directions ● Help Technical Leads manage the resources that can be allocated to the corresponding robot type from the perspective of the robot team	1 lead per robot type
Quality Management	● Person in charge of quality assurance during robot development ● Establish and maintain a quality management system	● Design robot test processes, test cases, and test methods, and organize functional, stability, life, and other tests at each stage of the development process to ensure the stability of robots' preset functions ● Engage in test method improvement and test tool development to improve test efficiency and quality	1-2

2.4 Technical Direction

When submitting the list in the registration system, the Captain must select the technical areas of all Regular Members and Reserve Members, categorized as follows:

Table 2-4 Technical Direction Classification

Direction	Instruction	Relevant Majors
Mechanical	Conduct robot structure design, assembly, and maintenance; responsible for the design costs and reliability of the robot structure.	Theoretical and Applied Mechanics; Engineering Mechanics; Mechanical Engineering; Mechanical Design, Manufacturing, and Automation; Mechatronics Engineering.
Embedded System/Electrical	Design and develop robot control systems (including but not limited to kinematic and dynamic control systems); select, verify, and debug robot sensors and other peripherals; and take responsibility for the design costs and reliability of the robot's embedded components and control algorithms.	Mechatronics Engineering; Automation; Artificial Intelligence; Electronic Information Engineering
Algorithm	Design and develop robot vision and navigation systems, as well as planning and decision-making algorithms; select and debug robot computing platforms; take responsibility for the design costs and reliability of components related to the robot computing platform and host computer algorithms.	Automation; Artificial Intelligence; Robotics Engineering; Computer Science and Technology; Software Engineering; Electronic and Computer Engineering
Hardware	Select, design, and develop robot hardware platform (including but not limited to supercapacitors, control boards, motor ESCs); take responsibility for the design costs and reliability of the robot hardware platform.	Electronic Information Engineering; Electronic Science and Technology; Microelectronics Science and Engineering; Integrated Circuit Design and Integrated Systems
Software	Carry out development of custom client for competition robots, control software, various debug tools, as well as other application software that contribute to team building and development, such as member management system development and simulator development.	Computer Science and Technology; Software Engineering; Data Science and Big Data Technology; Network Engineering; Electronic Information Engineering, etc.

Direction	Instruction	Relevant Majors
Operations	The operations track is further divided into: communications, business development, logistics, and finance.	/

2.5 Rule Q&A

The RMOC can be reached via the following contact channels. Working hours: Weekdays, 10:30–12:30 and 14:00–19:30. For more contact information and Q&A guidelines for the RMOC, please refer to the RoboMaster Organizing Committee official channel summary and Q&A guidelines.

Table 2-5 Communication Channels

Channel	Contact Information
Forum	bbs.robomaster.com
E-mail	robomaster@dji.com
Phone	+86 0755-84357613
WeChat	 When sending a WeChat friend request, please indicate “institution name + position+ name”

3. Season Schedule

The following season schedule is for reference only. The specific time is subject to the latest announcement by the RMOC.

The RMUC 2026 consists of two schedules: the Online Schedule and the On-Site Schedule. The RMOC recommends that each team formulates a preparation plan and a robot production budget and plan before the competition to estimate the manpower and funds needed and avoid wasting such resources.

Participating teams must complete registration, and only after finishing and passing the corresponding Technical Assessment before the deadline will they be eligible for participation and receive the corresponding RoboMaster product Educational Discount (hereinafter referred to as “product discount”) provided by the RMOC.

- For the Technical Assessment guidelines, please refer to “4 Technical Assessment”.
- For details on the product discounts corresponding to each Technical Assessment section, please refer to the [“RMU 2026 Instructions for Purchasing Materials.”](#)

Table 3-1 Online Schedule

Schedule	Section	Instruction
October 29, 2025, 18:00 - November 6, 2025, 18:00	Registration	Log in to the RoboMaster forum and complete the registration as required.
November 26, 2025, 18:00 - November 27, 2025, 18:00	Technical Assessment: Season Planning	● Eligible to the product discounts corresponding to the section. ● Obtain submission permissions for the Rule Exam
December 24, 2025, 18:00 - December 25, 2025, 18:00	Technical Assessment: Rule Exam	● Eligible to the product discounts corresponding to the section. ● Obtain permissions to submit the Mid-Term Progress Documentation
January 28, 2026, 18:00 - January 29, 2026, 18:00	Technical Assessment: Mid-term Progress Documentation	● Eligible to borrowing a Hero Referee System, an Infantry Referee System, and a Sentry Referee System ● Eligible to the Final Robot Assessment Teams participating in the RMUL 2026 3V3 Match and those that have passed this section are allowed to claim no more than one set of Referee System for each robot type.
March 16, 2026, 18:00 - March 19, 2026, 18:00	Technical Assessment: Final Robot Assessment	● Eligible to borrowing a full set of Referee Systems ● Obtain Permissions to submit Competition Feedback for the Referee System Assessment The scores received for the Project Documents and Technical Proposal will affect the team's initial gold coin for each round during the Regional Competition.
April 8, 2026, 18:00 – April 22, 2026, 18:00	Technical Assessment: Referee System Assessment	Obtain eligibility for Participation in on-site competitions.

April 10, 2026, 18:00 – April 13, 2026, 18:00	Competition Feedback	The participating teams first choose their preferred division. The RMOC will then determine the final list of participating teams for each division based on the region in which the team’s college or university is located and their ranking on the Score and Rank Chart.
June 2026	Technical Assessment: Regional Season Summary	Eligible for Regional Competition prize distribution
August 2026	Technical Assessment: Final Season Summary	Eligible for Finals prize distribution

Table 3-2 On-site Schedule

Schedule	Project
May – June 2026	Regional Competition (Mainland China)
July – August 2026	Finals (including Wildcard and Final Tournament)

- RMUC 2026 will not include Regional Competitions for Hong Kong, Macao, Taiwan, and overseas teams or Invitational Competitions.

- Teams from Hong Kong, Macau, Taiwan and overseas will participate in the Regional Competition (Mainland China) together with Teams from Mainland China to compete for places in the Finals.

4. Technical Assessment

The purpose of the Technical Assessment is for the teams to demonstrate their technical skills and guide them in their plans and preparations as well as development based on previous experience. It also offers an opportunity for team members to polish their skills, including requirements analysis, budgeting, data analysis and report drafting. All teams must complete the Technical Assessment in accordance with the requirements of the RMOC and within the time specified.

RMUC 2026 mainly features six Technical Assessment sections: Season Planning, Rule Exam, Mid-Term Progress Documentation, Final Robot Assessment, Referee System Assessment, and Season Summary. The latest tasks and requirements for each section of the Technical Assessment are subject to [forum announcements](#). For the schedule of each section, please refer to “3 Season Schedule”.

In addition, the pilot of a participating team must pass the Pilot Assessment to qualify for flying the team’s Drone. Otherwise, the Drone can enter the field but cannot take off. Failing the Pilot Assessment does not affect the qualification of the team and the Pilot for participating in the competition. The tasks and requirements for the Pilot Assessment will later be published in a [forum announcement](#).

Below are the specifications for the video and other files to be submitted for the Technical Assessment:

Participating teams must attach forms and videos as attachments to the forum reports for each section.

Table 4-1 Submission Specifications

Document Type	Specifications
Table/Form	● Format: Excel ● Source Han Serif-Regular (Chinese) or OpenSans-Regular (English) ● Table format: Enable text wrapping, and automatically adjust row height and column width. ● Vertically center the text, and left- or center-align the text horizontally, unless otherwise specially requested.
Video	● 4. Videos must have a resolution of 720p or higher. ● Upload method: Upload the video as a report attachment. ● Content: ➢ Subtitles or commentaries should be included to explain each process in the video. ➢ Only relevant content should be shown, with the video well-paced and its duration not exceeding the set limit.

4.1 Season Planning

Number of submissions: 1

Passing criteria: Achieve a Level of “C” or above

Content to be submitted and requirements:

- Season Plan: RoboMaster forum report text, without word limit (be concise)
- Progress Report: Excel document
- Budget Report: Excel document

4.2 Rules Exam

Rule Exam content includes: “[RoboMaster 2026 RoboMaster University Series Robot Specification Manual](#),” “[RoboMaster 2026 RoboMaster University Championship Rule Manual](#),” and other relevant competition terms.

4.3 Mid-term Progress Documentation

Number of submissions: 1

Passing criteria:

- The project documents are rated C or above.

Content to be submitted and requirements:

- Progress Report (updated): Excel document
- Project analysis: RoboMaster forum report text

4.4 Final Robot Assessment

Chance for submission: 1

Passing criteria: Teams will be ranked by their scores in the Final Robot Assessment, and the top 96 teams will qualify.

Content to be submitted and requirements:

- Final Robot Presentation: Video
- Technical Proposal: RoboMaster forum report text
- Project documents:
 - Cost Report: RoboMaster forum report text
 - Expenditure Record: Excel document

- Robot BOM Record: Excel document
-

The ratings of the Project Documentation and Technical Proposal in the Final Robot Assessment will affect the initial gold coin allocation for the Regional Competition (Mainland China). For details on the impact, please refer to the “[RoboMaster 2026 University Championship Rule Manual](#).”

4.5 Referee System Assessment

The Referee System Assessment mainly covers the following content: “[RoboMaster 2026 RoboMaster University Series Robot Specification Manual](#),” “[RoboMaster Referee System User Manual](#),” [Referee System FAQ](#), [manuals for each Referee System Onboard Module](#), and other related materials regarding mounting specifications, usage, and common troubleshooting for the Referee System Onboard Modules. The Referee System Assessment is conducted through random selection. If all randomly selected team members pass the evaluation, the team will be considered to have passed this section and will qualify for participation.

4.6 Season Summary

Number of submissions: 1

Passing criteria: Achieve a Level of “C” or above

Content to be submitted and requirements:

- Season Summary: RoboMaster Forum Report Text

5. Awards

This chapter sets out the awards structure for the RMUC 2026.

The names of the awards may differ from those on the actual certificates issued.

5.1 Regional Competition

The Regional Competition Awards are as follows:

Table 5-1 Regional Competition Awards

Awards	Rank	Quantity	Reward
Regional First Prize	Regional Champion: Regional First Place	1 per region	● Champion trophy ● Regional first prize certificate ● Cash prize of RMB 30,000 (pre-tax)
	Regional First Runner-up: Regional Second Place	1 per region	● Second place trophy ● Regional first prize certificate ● Cash prize of RMB 30,000 (pre-tax)
	Regional Second Runner-up: Regional Third Place	1 per region	● Third place trophy ● Regional first prize certificate ● Cash prize of RMB 30,000 (pre-tax)
	Regional Third Runner-up: Regional Fourth Place	1 per region	● Third runner-up trophy ● Regional first prize certificate ● Cash prize of RMB 30,000 (pre-tax)
	Regional Fifth – Eighth Places	1 per region, 4 in total	● Regional first prize certificate ● Cash prize of RMB 15,000 (pre-tax)
	Regional Ninth – Sixteenth Places	8 per region	● Regional first prize certificate ● Cash prize of RMB 8,000 (pre-tax)

Awards	Rank	Quantity	Reward
Regional Second Prize	Regional Seventeenth – Thirty Second Places	16 per region	Regional second prize certificate

5.2 Final Tournament

The Final Tournament Awards are as follows:

For teams ranked among the top 16 or higher in the Final Tournament (including the top 16), the prize money is divided into three independent components. Completing the requirements for each part will earn the corresponding portion of the prize. The sum of these awards constitutes the total prize amount.

- Part I: Competition results, accounting for 80%
- Part II: Open source technology, accounting for 10%. Winning teams must follow the official guidelines to open source the robot data specified by the RMOC. The RMOC will grant additional Open Source Awards based on the extent of open source contributions.
- Part III: Legacy analysis, accounting for 10%. Winning teams must submit documentation related to personnel retention and technical knowledge accumulation as evidence of building team legacy, and open source the “Team Legacy Analysis” section in their Season Summary; the RMOC may award the “Torchbearer Award” based on the submitted materials.

Table 5-2 Final Tournament Awards

Awards	Rank	Quantity	Reward
National First Prize	Champion: First place	1	- Champion trophy - Champion medal - First prize certificate - Cash prize of RMB 150,000 (pre-tax)
	First Runner-up: Second place	1	- Second place trophy - Second place medal - First prize certificate - Cash prize of RMB 150,000 (pre-tax)
	Second Runner-up: Third place	1	- Third place trophy - Third place medal

Awards	Rank	Quantity	Reward
			● First prize certificate ● Cash prize of RMB 150,000 (pre-tax)
	Third Runner-up: Fourth place	1	● Third runner-up trophy ● Third runner-up medal ● First prize certificate ● Cash prize of RMB 150,000 (pre-tax)
	Fifth to sixteenth places	12	● First prize certificate ● Cash prize of RMB 30,000 (pre-tax)
National Second Prize	Seventeenth to thirty second places	16	● Second prize certificate ● Cash prize of RMB 10,000 (pre-tax)
	Teams that have advanced from the Regional Competition to the Wild Card Competition but have not advanced to the Final Tournament	12	● Second prize certificate ● Cash prize of RMB 8,000 (pre-tax)
National Third Prize	Teams from Chinese mainland that have won the First Prize in the Regional Competition but have not advanced to the Final Tournament	4	● Third prize certificate
	Seventeenth to thirty second place in each region	48	● Third prize certificate

5.3 Open Source Award

Teams applying for the Open Source Award are required to make their core technologies or operation management approaches open-source during the 2026 season (May to August 2026) via RoboMaster forums and other channels, to advance the development of the RoboMaster competition and promote the culture and spirit of engineers.

There is no fixed number of winners for each open-source award. The RMOC will select winners based on the completeness and quality of the submitted open-source material proposals (including, but not limited to, software, hardware, and mechanical aspects). If there are no open-source projects of an outstanding nature, no winner will be announced for the Open Source Grand Prize. But if there is more than one outstanding open-source project, the Grand Prize may be awarded to multiple winners.

5.3.1 Awards

The Open Source Awards are as follows:

Table 5-3 Open Source Awards

Awards	Quantity	Reward
Grand Prize	Several winners	● Award certificate (for teams) ● RMB 100,000 (pre-tax)
First Prize	Several winners	● Award certificate (for teams) ● RMB 50,000 (pre-tax)
Second Prize	Several winners	● Award certificate (for teams) ● Cash prize of RMB 15,000 - 30,000 (pre-tax), awarded based on an overall assessment of the open-source materials
Third Prize	Several winners	● Award certificate (for teams) ● RMB 10,000 (pre-tax)
Outstanding Award	Several winners	● Award certificate (for teams) ● Cash prize of RMB 2,000 - 5,000 (pre-tax), awarded based on an overall assessment of the open-source materials

5.3.2 Selection Criteria and Process

The RMOC will score the open source materials according to the following two criteria: basic format and content. For detailed selection criteria, please refer to the [“RoboMaster University Series \(RMU\) Open Source Award Guidelines and Selection Criteria.”](#)

1. Teams from Mainland China should upload their open-source files to the forum and assign the appropriate content tags based on the open-source materials as follows: RM2026 + school name + team name + open-source direction + content description.

2. To apply, teams are required to complete a questionnaire (to be provided later).
3. The RMOc will assess and select the winners based on the questionnaires and the quality of the open-source content submitted by the teams.

5.4 Organization Award

5.4.1 Awards

The Organization Awards are as follows:

Table 5-4 Organization Awards

Awards	Quantity	Reward
Torchbearer Award	Several winners	● Award certificate (for teams) ● Cash prize of RMB 5,000 (pre-tax)
Rookie Award	No more than 5 teams	● Award certificate (for teams) ● Cash prize of RMB 5,000 (pre-tax)
Mainstay Award	No more than 5 teams	● Award certificate (for teams) ● Cash prize of RMB 5,000 (pre-tax)
Cost Control Award	No more than 5 teams	● Award certificate (for teams) ● Cash prize of RMB 1,000 - 3,000 (pre-tax), awarded based on an assessment of the submitted materials.
Top Tactician Award	No more than 5 teams	● Award certificate (for teams) ● Cash prize of RMB 1,000 - 3,000 (pre-tax), awarded based on an assessment of the submitted materials.
Best Season Schedule Award	No more than 10 teams	● Award certificate (for teams) ● Cash prize of RMB 1,000 - 5,000 (pre-tax), awarded based on an assessment of the submitted materials
Best Technical Report Award	No more than 5 teams	● Award certificate (for teams) ● Cash prize of RMB 1,000 - 5,000 (pre-tax), awarded based on an assessment of the submitted materials
Competitive Spirit Award	No more than 5 teams in the season	● Award certificate (for teams)

5.4.2 Selection Criteria and Process

Table 5-5 Organization Award Selection Criteria and Process

Awards	Selection Criteria	Selection Process
Torchbearer Award	● Demonstrates a strong awareness of team succession, capable of analyzing succession needs in terms of personnel, technology, and culture. They establish appropriate systems for team building, achieve tangible results, and enable the team to attain better competitive outcomes. ● Able to evaluate each season's circumstances, summarize effective strategies and experiences related to team legacy, and continuously iterate and improve. ● Able to summarize effective legacy measures or models that offer valuable insights and have a positive influence on other Teams.	● Applicants are required to complete a questionnaire to apply, and the RMOC will select the best candidates based on the application forms.
Rookie Award	Including participating teams with stable and improved performance for two or three consecutive years, including the current season, with priority given to teams that have shown greater progress.	● Teams showing greater improvement will be given priority for the award. ● Placement levels: 1. Not qualified for Regional Competition 2. Top 32 in Regional Competition 3. Top 16 in Regional Competition 4. Top 32 in Final Tournament 5. Top 4 in Regional Competition/Top 16 in Regional Competition

Awards	Selection Criteria	Selection Process
		6. Top 8 in Final Tournament 7. Top 4 in Final Tournament
Mainstay Award	Including teams that have placed between ninth and thirty second in the Final Tournament for three consecutive seasons, including this season, with preference given to teams demonstrating steady and strong performance.	Teams with a longer participation history and better results will be given priority.
Cost Control Award	● Cost data is clear and complete and can reflect the cost management or the result of cost control. ● Cost control schemes and methods are highly executable. ● During the match preparation stage, actively share the effective and replicable cost control method and case publicly	● After sharing their methods on the bbs.robomaster, teams are required to submit materials for appraisal, such as cost reports, etc. ● The RMOC will select the best candidates based on the cost-related assessment scores and submitted materials from each stage of the Technical Assessment.
Top Tactician Award	● The team displays a good competitive spirit, with no serious violations of competition rules and proper standards of conduct. ● The team achieves good team results via tactical operations. ● The team's tactics are instructive to other participating teams, having a positive impact on the overall performance of teams in the event.	● The team submits application materials, such as tactics development process, documents on tactics-related actions (operator training), etc. ● The RMOC selects the best according to teams' performance and submitted materials.

Awards	Selection Criteria	Selection Process
Best Season Schedule Award	The team shares their 2026 Season Plan on the forum (bbs.robomaster) and gains high rankings in this section in the Technical Assessment among all teams that also share their plans.	● The team is required to complete a questionnaire to apply. ● The RMOC will collect the open source materials from the RoboMaster forum and select the winners based on the rankings. *Name the open-source post: “[Season Planning + School Name Team Name + RM2026 Season Planning Open-Source]”
Best Technical Report Award	The team has gained a high rating for their Technical Proposal during the Final Robot Assessment, compiled a Technical Report based on the proposal, and shared the report on the forum at the end of the season, as per the RMOC’s request.	At the end of the season, the RMOC will communicate with teams that have a highly rated Technical Proposal. Teams that improve their Proposal upon the request and make it openly available will be selected as candidates for the award. *Open source post should be titled: [Technical Report + School Name Team Name + RM2026 Technical Report Open Source]
Competitive Spirit Award	● The team displays a good competitive spirit (as reflected by their penalty records in official competitions), with no serious violations of competition rules and proper standards of conduct. ● The team is active in forums, WeChat groups, etc., and interacts well with the RMOC, volunteers, and other teams.	● Selections to be made according to the feedback given by the staff of the RMOC, other teams, and volunteers of the competition. ● Teams with more positive feedback from the RMOC staff, other teams, and event volunteers will be given priority.

Awards	Selection Criteria	Selection Process
	The team is helpful, active, and an open source of information for others, enthusiastically sharing their experience and willing to provide resources to other teams.	

5.5 Robot Combat Award

The number of Robot Combat Awards will be determined based on the selection criteria and the total number of participating teams in each Regional Competition, following the ratios outlined in the table below. If the calculated result is not an integer, the number will be rounded to the nearest whole number according to standard rounding rules, using the digit in the second decimal place. If the number of teams falls below four, the allocation of each award will be manually reviewed and determined. Please refer to future official announcements for final details.

5.5.1 Awards

The Robot Combat Awards are as follows:

Table 5-6 Robot Combat Awards

Awards	Instruction
Robot Type	Infantry, Engineer, Hero, Drone, Sentry, Dart System, and Radar
Quantity	- First Prize: approximately 15% - Second Prize: approximately 25% - Third Prize: Several - Honorable Mention: Several Note: The number of awards for each Level of each robot type will be adjusted based on the actual number of participating teams eligible for awards and the actual performance of each Robot in the competitions.
Reward	Award certificate (for teams)

5.5.2 Selection Criteria and Process

Table 5-7 Selection Criteria and Process for Robots Combat Awards

Robot Type	Selection Criteria	Selection Process
Hero	Average damage per second (total damage caused by the robot/total official competition duration of the robot's team)	- Based on the actual performance of each robot in the competition, specific data is selected for ranking. If there are multiple robots of the same type, the robot with the best data will be used for ranking. Evaluation will be conducted according to a certain proportion. Robots that qualify for nomination and meet the minimum award requirements must have server records of entering the field during the competition. - The data is selected from the Regional Competition. - Due to technical reasons, when robots inflict projectile damage during a match, there may be instances where the referee system fails to detect the specific source of the damage. In such cases, this untraceable damage will be allocated based on the proportion of this type of projectile damage previously inflicted by each robot within the respective target category, and used as the final basis for awards.
Engineer	Average assembly score per round (1 point for each Level 1 difficulty, 10 points for each Level 2 difficulty, 20 points for each Level 3 difficulty, and 100 points for each Level 4 difficulty)	
Infantry	Average damage per second (total damage caused by the robot/total official competition duration of the robot's team)	
Drone	Average damage per second (total damage caused by the robot/total official competition duration of the robot's team)	
Sentry	Average damage per second (total damage caused by the robot/total official competition duration of the robot's team)	
Dart System	Average hits per round score (1 point for a hit on the Outpost, 5 points for a hit on a fixed Base target, 10 points for a hit on a random fixed Base target, 100 points for a hit on a randomly moving Base target, and 200 points for a hit on a terminal moving Base target)	
Radar	Average Radar performance score per minute ((total accurate tracking time * 1 + number of anti-drone actions * 20 + number of successfully decoded information wave difficulty levels * 200) / total official match duration for the team with the Radar)	

5.6 Annual Technical Breakthrough Award

The winners of the Annual Technical Breakthrough Awards must share their relevant robot types as open-source content in accordance with the rules and specifications. Otherwise, the payment of the cash prizes may be affected. The RMOC may grant the winner an additional Open Source Award depending on their open-source contribution (the prize money is whichever higher of the two awards).

5.6.1 Awards

Table 5-8 Annual Technical Breakthrough Awards

Awards	Quantity	Reward
First Prize	No more than 1 for each robot type	● Award certificate (for teams) ● Cash prize of RMB 15,000 (pre-tax)
Second Prize	No more than 2 for each robot type	● Award certificate (for teams) ● Cash prize of RMB 10,000 (pre-tax)
Third Prize	No more than 3 for each robot type	● Award certificate (for teams) ● Cash prize of RMB 5,000 (pre-tax)
Excellence Prize	Several winners	● Award certificate (for teams)

5.6.2 Selection Criteria and Process

The RMOC conducts a comprehensive evaluation based on multiple aspects, including the theoretical guidance and practical application in robot category design, competition performance, technical innovation, and breakthroughs, to select the first, second, and third prizes, as well as the excellence award.

5.7 Outstanding Contribution Award

Outstanding Supervisor (Team) award recipients, Outstanding Captain (Team) award recipients, and Outstanding Project Manager award recipients are required to submit a personal work summary and experience description within one month after the selection result is announced and are obligated to participate in the sharing sessions and surveys conducted by the RMOC.

The team of the Outstanding Contribution Award recipient demonstrates excellent sportsmanship and has not committed any serious violations of competition rules or the spirit of fair play.

5.7.1 Awards

The Outstanding Contribution Awards are as follows:

Table 5-9 Outstanding Contribution Awards

Awards	Quantity	Reward
Outstanding Supervisor (Team)	No more than 10 teams in total for this season	● Award certificate (for individuals) ● Cash prize of RMB 8,000 (pre-tax)
Outstanding Captain (Team)	No more than 8 groups in total for this season	● Award certificate (for individuals) ● Cash prize of RMB 5,000 (pre-tax)
Outstanding Project Manager	No more than 8 people in total for this season	● Award certificate (for individuals) ● Cash prize of RMB 5,000 (pre-tax)
Outstanding Operations Manager	No more than 8 people in total for this season	● Award certificate (for teams) ● Cash prize of RMB 5,000 (pre-tax)
Outstanding Supervisor	No more than 8 people in total for this season	● Award certificate (for individuals) ● Cash prize of RMB 3,000 (pre-tax)

5.7.2 Selection Criteria and Process

Table 5-10 Selection Criteria and Process for Outstanding Contribution Awards

Awards	Selection Criteria	Selection Method
Outstanding Supervisor (Team)	● The supervisor guides the team and instills team culture, displays a high sense of responsibility, takes care of each team member, promotes the growth and development of students in the field of competition, and is deeply revered by students.	● Applicants must complete a questionnaire to apply. Meanwhile, the organizing committee will make internal nominations based on the season's circumstances and select the most outstanding candidates through a comprehensive review of the questionnaire materials. ● If the requirements of the “RoboMaster University Series Supervisor Recommendation Policy” are met, the

	● Lead the team in achieving sustained, healthy development and progress, and guide the team in knowledge transfer by ensuring technical expertise, retention of key personnel, and effective resource coordination. ● Identify outstanding talent within the team, provide guidance and support for further study and career development, and actively support and participate in RoboMaster talent recommendation according to relevant procedures.	RMOC will award an additional bonus based on the number of successful recommendations: RMB 1,000 per person recommended (pre-tax).
Outstanding Captain (Team)	● Develop reasonable team development directions and objectives, plan key technical pathways, identify core challenges, organize technical breakthroughs, and lead major decisions. ● The Captain plans effective resources within the team and properly allocates tasks to ensure efficient completion of tasks. ● Possesses a strong sense of belonging to the event and the team, leads by example, spearheads team building while embodying positive cultural values, and focuses on the development and growth of team members.	● Applicants are required to complete a questionnaire to apply, and the selection committee will review the materials and choose the best candidates. ● Placement levels: 1. Not qualified for Regional Competition 2. Top 32 in Regional Competition 3. Top 16 in Regional Competition 4. Top 32 in Final Tournament 5. Top 4 in Regional Competition/Top 16 in Regional Competition 6. Top 8 in Final Tournament 7. Top 4 in Final Tournament

	● Demonstrates strong management awareness, able to establish or continuously iterate and optimize internal team processes and mechanisms based on the team's actual needs, leading the team toward healthy development. ● The team's final placement (total score) in this season is on a par with or has improved compared with their results in the previous season.	A Captain (Team) who wins an RM Award (Management) in this season will automatically receive the Outstanding Captain (Team) Award, and this will not count towards the total quota. The higher cash prize will be distributed.
Outstanding Project Manager	● The project manager does a good job of managing the team's projects, including effectively coordinating and promoting team members to work in concert, making project schedules, controlling project quality and risks, and communicating to ensure that projects advance as planned. ● The project manager assists the captain (team) in work such as requirement management, version planning, project process formulation and optimization. ● Strong sense of process closure, exceptional drive, responsible for coordinating and aligning resources, proactively establishes efficient process mechanisms, and effectively addresses resource and scheduling challenges within the project.	● Applicants are required to complete a questionnaire to apply, and the selection committee will review the materials and choose the best candidates. ● A Project Manager who wins an RM Award (Management) in this season will automatically receive the Outstanding Project Manager Award, and this will not count towards the total quota. The higher cash prize will be distributed.

	● Able to effectively capture and document project experience, ensure its application and ongoing improvement within the Team.	
Outstanding Operations Manager	● Oversee the team's operations, integrate internal and external Team resources, enhance the team's influence, and help alleviate resource pressures such as funding for the team. ● Dedicated to building the team's culture. ● Able to effectively consolidate operational experience, ensure its continued implementation within the Team, and drive ongoing improvement.	Applicants are required to complete a questionnaire to apply, and the RMOC will select the best candidates based on the application forms.
Outstanding Supervisor	● The supervisor provides constructive and practical suggestions to the team in terms of technological innovation, tactical design, team management, team building, etc., and provides guidance and support to the team in terms of strategy, technology, management, etc. ● Able to preserve personal experience in the form of technical documentation or process mechanisms for the Team, guide veteran members to provide the Team with necessary support, and help the Team effectively retain technical knowledge.	Applicants are required to complete a questionnaire to apply, and the RMOC will select the best candidates based on the application forms.

5.8 RM Award

The RM Awards recognize and reward outstanding team members who are at the forefront of technical innovation and breakthroughs.

There is no fixed number of RM Awards, and the RMOC will assess candidates according to their submitted materials and interview performance.

5.8.1 Awards

Table 5-11 RM Award Awards

Awards	Quantity	Reward
RM Award (Technical)	Several winners	● Award certificate (for individuals) ● Cash prize of RMB 10,000 (pre-tax) ● Invitation to a job interview
RM Award (Management)	Several winners	● Award certificate (for individuals) ● Cash prize of RMB 10,000 (pre-tax) ● Invitation to a job interview

5.8.2 Selection Criteria and Process

Table 5-12 RM Award Selection Criteria and Process

Awards	Selection Criteria	Selection Process
RM Award (Technical)	● Embody the ethos of the competition – “pushing the boundaries of knowledge through research and practice” – in daily R&D work. ● Show willingness and ability to learn, capable of exploring the principles of new areas of knowledge and applying them to real R&D tasks. ● Brace for challenges and rise to difficulties, make significant contribution to overcoming cutting-edge technical issues or bottlenecks, and inspire the rest of the team to strive for technical breakthroughs.	● After the Regional Competition, candidates submit the application materials according to the requirements. ● Upon receipt of applications, the RMOC will screen the application materials.

Awards	Selection Criteria	Selection Process
	● Provide high-quality technical solutions for specific tasks or problems encountered during the competition. ● The core content of the application materials should demonstrate either a breakthrough or significant improvement achieved by the applicant for the first time during the competition compared to existing solutions, and the technical proposal must have been practically applied during the preparation or competition process.	● Among candidates who pass the preliminary screening, the RMOC will select the winners according to their interview performance.
RM Award (Management)	● Demonstrates strong management awareness, proactively establishes and refines internal management systems for personnel, schedule, and cost control, and leads the team to achieve its goals. ● Strong analytical skills, able to identify key issues and analyze root causes; capable of recognizing team risks and making critical decisions. ● Highly driven, sets high standards, actively tackles challenges, and is willing to break boundaries; leads by example and champions the competition's culture and spirit. ● The core content of the application materials should focus on the applicant's primary contributions and improvements since assuming the role.	● Keep an eye out for subsequent announcements concerning the full selection process of the RM Awards 2026.

Appendix: Safety Instructions

Every participant must fully understand and accept that safety is the most crucial prerequisite for the sustainable development of the RoboMaster Competitions. In order to protect the rights and interests of all team members and the event organizers, and according to relevant laws and regulations, all team members who have registered for the RoboMaster Competitions will be deemed to have acknowledged and agreed to abide by the following safety terms:

1. All team members who have registered to participate in the RoboMaster Competitions must confirm that they have full capacity for civil conduct and they are able to build and operate robots independently. They must also make sure that they have read in detail the Registration Guide and Competition Regulations among other important documents stating the rules and regulations of the competition, before starting to use any products by SZ DJI Technology Co., Ltd. to build robots.
2. During the competition, all team members should make sure that their actions including the creation, testing, and use of robots, will not cause any injury or damage to his or her teammates, members of the opposing teams, referees, competition staff, audience, equipment, or the Competition Area.
3. All teams must ensure that the structural design of their robots will not hinder safety inspection during the Pre-match Inspection and agree to fully cooperate with the Pre-match Inspection carried out by RoboMaster's organizers.
4. It is prohibited to use fuel-powered engines, explosives, hazardous chemical materials, and hydraulic or other propulsion methods that may cause pollution.
5. During any stage of development, preparation, and Participation, each Team Member must pay close attention to safety, comply with the Battery Safety Regulations of the RoboMaster University Series (RMU), and instructors are responsible for providing safety guidance and supervision.
6. The team must guarantee the safety of all the robots. This includes ensuring the Launching Mechanisms installed on the robots are safe and that they will not cause any harm (either directly or indirectly) to any team members, referees, staff, and audience.
7. All teams shall take sufficient and necessary safety measures during the R&D, training, and competition periods regarding any hazardous situations that may occur. These include but are not limited to: preventing the control system from becoming unstable; anticipating every operation step prior to execution to avoid errors or collisions between team members or between robots and team members; prohibiting team members from engaging in solo training and making sure there are always personnel present to respond to any emergencies; wearing goggles; applying appropriate locks and adding safety features such as an emergency stop button to robot systems during commissioning.
8. In the event of accidents resulting from technical faults of robots, loss of control of Drones, or any other unexpected circumstances, all liability and losses shall be borne by the team causing the accident.

9. The aerial robots of participating teams are allowed to fly only above certain restricted areas in competition venues. Therefore, no flight permit is required. To ensure the flight safety of an aerial robot, use an aerial safety rope to connect the aerial robot to a fixing pile on the ground. If an accident occurs, for example, if the aerial robot breaks away from the safety rope, the pilot must stop the motors and land the aerial robot as soon as possible. It is strictly prohibited to continue to fly in case of an accident. Participating teams are strictly prohibited from flying aerial robots outdoors.
10. The materials bought from or provided by the organizer SZ DJI Technology Co., Ltd., such as batteries and the Referee System, must be used in accordance with their instructions. SZ DJI Technology Co., Ltd. will not be held responsible for any injuries that arise from improper use of these materials. Teams will be held responsible for any injuries caused to their own members or any third party and for any property loss arising from creating and operating any robots.
11. All team members must remain in strict compliance with the laws and regulations of the country or region. All team members must also pledge that their robots will only be used for the RoboMaster competitions and that their robots will not be illegally modified or used for any illicit purpose(s).
